

Grand Slam of Cleaners

Safe Technology that "is the best solution"

Slice, Clean Masheen, Cast Clean S and LMC-70-RR clean up on our competition.

"Lean Manufacturing" depends upon the 5-S approach.

整理・整頓・清掃・清潔・躰

- 1) Seiri (tidiness)
- 2) Seiton (orderliness)
- 3) Seiso (cleanliness)
- 4) Seiketsu (standardization)
- 5) Shitsuke (sustaining)

Three of the 5-S principals are "clean" related. Cleanliness is imperative in a lean plant. As a matter of fact, you need cleanliness before any of the 5-S program can take place. Dirt can cause a number of catastrophic consequences.

- 1) Dirt around a machine makes its operation difficult, if not dangerous.
- 2) Surrounding dirt will contaminate the product you are making.
- 3) Your production will go up because people will work much better in an environment that is clean and safe.

The Chemtool Solution

Slice: Premium multi purpose maintenance cleaner. Formulated as a floor cleaner, sump cleaner, general purpose hard surface cleaner and immersion cleaner. Excellent de-greasing properties.

LMC-70RR: Multipurpose maintenance cleaner that can be used in mop buckets, hand scrub applications as well as steam jennies, floor scrubbers and immersion tanks. LMC-70RR is specially formulated to penetrate and remove oily soils leaving behind a clean non-slip surface at concentrations ranging from 1/3% up to 50% by volume. LMC-70RR also is an excellent coolant sump cleaner for metalworking applications.

Clean Masheen: Professional machine tool cleaner. Mild general industrial maintenance cleaner that is designed to clean both the machine and it's tooling.

Cast Clean S: Unique formulated, silicate free cleaner designed specifically for cast aluminum. Formulated with an exceptionally high level of detergency and wetting agents.

Chemtool Incorporated continues to provide it's customer base with new technologies and innovations that allow you to run *leaner and cleaner, which translates to additional revenue for your bottom line.*

Slice High detergency biodegradable multi purpose cleaner. Rapidly penetrates and lifts petroleum oil, animal fats and waxes off of floors and machine surfaces.

Lean concentrations assure low consumption and cost effectiveness. High detergency/surfactant package providing added cleaning power beyond alkalinity. Safe on all metals. Contains no phosphates, nitrites or silicones.

LMC-70RR High detergency, multi-purpose maintenance cleaner. Lean concentrations assure low consumption and cost effectiveness. High detergency/surfactant package providing added cleaning power beyond alkalinity. Safe on all metals except some aluminum alloys. Contains no phosphates, nitrites or silicones.

Clean Masheen Clean Masheen is excellent for cleaning grime, sludge, smut, and build-up from way covers, index tables, spindles, ball screws, collet chucks, shafts, tool sockets, vises, mandrels, electric motor covers, outer boxes and other machine tool components. In addition Clean Masheen protects all surfaces from rust and corrosion and will not adversely affect cutting fluids or cleaners.

Cast Clean S Extremely high detergency characteristics for superior penetration and wetting. Silicate free: Unique formulation provides for residue free parts ideal for post painting and plating operations. Exceptional hard water stability keeps washers clean and free of maintenance. Lean concentrations assure low consumption and cost effectiveness. Contains no phosphates, silicones, nitrites or silicones
