

Die Cast: From Shot to Finish:

Chemtool Incorporated has you covered.

Since 1963, Chemtool Incorporated has provided the die cast industry with technologies and innovations that allow your plant to run *leaner and cleaner, which translates to added dollars for your bottom line.*

Our experience and innovation have enabled plants like yours to run much more efficient. Our sales engineers will be there for you. Our commitment to you is that your plant will run smoothly, while reducing your chemical expense. Our customers set the parameters of their process by the characteristics and reliability of our lubricants and industrial fluids. We take that responsibility very seriously.

We produce all the products involved in your die cast operation. We work as your die cast partner. As a team member, we take over the responsibility for the initial survey, product recommendation, testing and implementation of your die cast program. We understand all aspects of how your die cast program works. You can count on us to provide greater efficiencies allowing you to run leaner.

Chemtool has a wide range of products that cover your needs from our Plunger Lubricants to start (Pro-shot series) to your finished end product (Cast Clean). Chemtool carries lubricants that work in a wide range of temperatures (300° F to 600°F), enabling you to use one source for all your Die Lubricant needs.

Basic Family

- Shot — Plunger Oils / Plunger Beads
 - Start Up—Anti Solder
- Die Lubricant—General Purpose to Specialties (Zinc Casting-Semi Solid)
- Cast Clean-Excellent Post Die (Prevents White Rust-eliminate paint problems)
